

## A powerhouse

The new large butterfly valves type 567 in DN250 and DN300

## ➤ Strong features for strong arguments

standard interface  
per ISO 5211

disc, inner body and  
bearing bushes made  
of the same material as  
the pipeline.  
Your benefit: better re-  
sistance to corrosion

robust outer body of  
PP-GF 30; connecting  
dimensions according to  
ISO, BS, ANSI, JIS

double eccentric  
operating principle

optimized modular  
components:

profile seal in the  
passage

special seal to the  
connecting element

# The large dimensions

The Georg Fischer name vouches for reliability and longevity. Our products guarantee quality, innovation and functionality. And the new large butterfly valves are no exception. You will find innovative ideas in every detail, starting with the modern and compact design and the double eccentric operating principle. Launched successfully two years ago in the small butterfly valves, the double eccentric principle has proved very beneficial. Consequently, we developed it further for the dimensions DN250 and DN300. These valves comply with all your needs and requirements and leave nothing to be desired in terms of reliability and efficiency.

## Higher nominal pressures

The new large butterfly valves with higher nominal pressures offer increased quality and better safety. The pressure rating for dimensions DN250 and DN300 is

PN10 for PVC-U and PVDF and PN8 for PP-H.

New is the PVDF version of these butterfly valves. PVDF is a material which opens the door to many new applications.

## Double eccentric operating principle

In the double eccentric construction, the sealing surface and the passage axis are offset from the center. On the predecessor model, which is based on a centric design, the sealing surface and passage axis are centered. Because the disc does not come into contact with the seal when in the open position, the double eccentric butterfly valve warrants good friction behavior, less wear and tear and therefore a longer service life.

You benefit by having to perform less maintenance, which saves you money in the end.

The large butterfly valves in DN250 and DN300 have a modular design and provide you with a large selection of versions to choose from. It is available in the materials PVC-U, PP-H and now also in PVDF. Optional choice of pneumatic, with gear box, hand lever or electric.
